

Basic Fabric Installation

STEP 1:

Remove all weeds from the desired area. For added protection, apply pre-emergent herbicide before laying down fabric.

STEP 2:

Unroll fabric and cut to desired length. Fit fabric around plants, lights, etc., by cutting slits or an “X” where needed. For best results, overlap each section 4 inches.

STEP 3:

Cover with 3-4 inches of mulch, stone or bark to protect fabric from sunlight and to enhance the appearance of your garden.*

Popular Applications

Use behind retaining walls for separation and drainage.

Use under wooden decks, rock or mulch beds for weed control.

Use under brick patios and sidewalks for weed control and stabilization.

Use to filter soil from around drainage and septic systems. Helps keep weeds under control in annual flower and vegetable gardens.
